

Item 19. Pavilion Main Entrance Auto Door

Following a recent call out for the Stair Lift Engineers to inspect the stair lift, due to a mechanical failure. It has been brought to the Council's attention that unauthorised users of the Pavilion have been entering when classes are being held and causing accidental damage to the stairlift.

The Access Systems contractor who visited last week and carried out a full service on our automatic door at Hythe Sports Pavilion, recommended a card reader unit to be installed, please see their quotation below:

- To supply and install 1 x switch control unit
- Cards x 50
- 1 x Maglock, surface mounted, monitored
- 1 x double pole break-glass unit
- 1 x press to exit button
- 2 x keys for mode switch
- 2 x engineers

Should the council wish to proceed with these works their charge will be £1,646.00 + VAT (REF: HW290921), please note that these works are to be carried out in normal working hours Monday to Friday, 08:00 – 16:30.

This would deter unauthorised use of the pavilion and classes to continue without outside disruption. It would also make the property more secure and reduce the risk of damage to the property and its contents.

This is a specialist company in this field and no other quotes have been sought.
